DNCA Invest - Miuri - Class N - EUR

A sub-fund of the SICAV DNCA INVEST - ISIN: LU1234714746

This fund is managed by DNCA FINANCE Luxembourg

Objectives and Investment Policy

Essential management characteristics:

Absolute Return Fund

The Sub-Fund seeks to achieve a higher annual performance than the risk-free rate represented by the EONIA rate. This performance is sought by associating it to a lower volatility than the equity market materialised by the Eurostoxx 50 index.

The Sub-Fund's strategy qualifies as Long/Short equity and its investment strategy relies on fundamental financial analysis. It invests in equities issued in Europe (EEA plus Switzerland). The global risk associated with investments of the Sub-Fund (Longs and Shorts) can not exceed 200% of the net assets of the Sub-Fund. With a net exposure limited to +/- 30% of assets under management, it is not significantly dependent on the equity market trends and the performance depends essentially on the capacity of the Investment Manager in identifying equities that have the characteristics to outperform their indexes or their sector indexes.

The Sub-Fund may at any time invest its net assets in:

- Equities issued in Europe (EEA plus Switzerland) or equivalent financial instruments (such as ETF, futures, CFD and/or DPS, etc.): from 0 to 100%,
- Equities issued out of EEA plus Switzerland: up to 5%,
- Equities with total market capitalisation below 150 million Euros: up to 5%,
- Euro zone Ordinary Bonds, convertible bonds or equivalent, money market instruments or deposits: from 0% to 100%,
- up to 10% in other financial instruments,

The Sub-Fund may invest up to 10% of its net assets in units and/or shares of UCITS and or AIFs.

The exchange risk will not exceed 10% of the net assets of the Sub-Fund.

For the purpose of hedging or increasing equity or currency risk without seeking overexposure, the Sub-Fund also operates on regulated markets of futures on European indexes (including or not in a DPS). The Sub-Fund also operates on the foreign exchange markets to cover investments realised outside the euro area or relating to the United Kingdom, Switzerland or Scandinavia.

The historical data used to calculate the synthetic indicator may not be a reliable indication of the future risk profile of the UCITS. The risk category associated with this sub-fund is not guaranteed and may change over time. The weakest category does not mean no risk. The risk level of this UCITS is due to exposure to equity and/or fixed income markets. The fund does not benefit from any capital protection or guarantee.

Material risks not taken into account in this indicator:

Credit risk: in the event that an issuer is downgraded, the value of the bonds in the portfolio may fall, thus decreasing the fund's net asset value.

Counterparty risk: the use of CFD may expose the investor to the risk of default by the counterparty.

Risk of using derivative products: the use of derivative instruments may reduce the net asset value in case of exposure in a direction opposite to that of the market trend.

The occurrence of one of these risks may lead to a reduction in the net asset value.
